Including cad and programming language 'ladder programming' logical functions, system programming, and similar.

Coach training for tennis - summer 2016 about 1 month (about 30h training)

Referee training for tennis - Day training 2015

About me

I am 26 years old and I am interested in learning more in IT and data such as programming. I got my driving license in 2016.

I practice tennis between 1-3h a week and am otherwise active with training of various kinds (Sundbyberg tennis club).

I am a social person who likes computers and its language. I am easy to learn and often do more than what is needed. Not afraid to ask if there is something I am wondering about.

I have played Counterstrike Global Offensive at semi-pro level and have a very good English.
